

AG150/GB50 Controller Web Screenshots

Login

Access to the web pages is secured using a customised username and password.

Monitor Air Conditioning - Block view

Each area of the building can be displayed with information about On/Off, Setpoint, Mode and Temperature.

Daily, Weekly and Annual Scheduling (AS PIN code)

Scheduling may be set from the web pages. A night set back operation is available (Heat, 12°C). Standard on the AG150/GB50.

Multiple Users (VRC PIN code)

If the AG150/GB50 is connected to an office LAN, the staff will then be able to access the web pages. With VRC each member of staff will have their own username and password.

Monitor Air Conditioning - Overview

The first screen allows you to monitor all the units connected to the AG150/GB50. Each icon displays On/Off, Faults and timer On/Off.

Remote Controller Settings

Click on any icons in the MonitorView page to access the remote controller. Lossnay units can also be controlled. Buttons on the local controllers may be locked (On/Off, Mode, Setpoint, Filter Reset).

Monitor Fault Codes

Faults with the unit address can be displayed under fault conditions. Email status can also be shown.

Multiple Users (VRC PIN code)

Installation costs will be reduced as no wall remote controllers will need to be purchased and installed.

Icons available to suit model type installed
