

Y Series (5hp)

R407c Heat Pump Outdoor Unit

The latest in Mitsubishi Electric Y Series technology incorporated within the new City Multi 5hp model allows up to 8 indoor units to be connected to a single outdoor unit, using the standard branch/header pipework system proven in 8 and 10hp models. Utilising the latest Mitsubishi Electric Inverter technology, the system is fully controllable with all City Multi controllers or linked to third party BMS.

- > A two core non-polar transmission line allows for simple installation of up to eight indoor units
- > The condensing unit is extremely slimline which allows easy location and application of the system
- > Available in both single phase and three phase power supply
